Madam/Sir,

**Subject: Credit Rating**

In terms of Regulation 30 read with point 3 of Para A of Part A of Schedule III of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 and SEBI circular no. CIR/CFD/CMD/4/2015 dated September 9, 2015, we wish to inform that S&P Global Ratings has assigned the credit ratings to the Bank as under:

Sr No.	Parameter	Existing Rating	Revised Rating
1.	Issuer Credit Rating (Long term/ Short Term)	BB+/Stable/B	BB+/Stable/B
2.	Standalone Credit Profile (SACP)	bb	bb-
3.	Bank's Senior Unsecured Notes (Long term)	BB+	BB+

The rating rationale of Standard & Poor is enclosed herewith.

This is for your information and appropriate dissemination.

Thanking you.

Yours faithfully,

*Mangesh Mandrekar*  
 (Mangesh Mandrekar)  
 Company Secretary

Research Update:

# Union Bank of India 'BB+/B' Ratings Affirmed With Stable Outlook; SACP Revised To 'bb-' On Weakened Capital Buffers

December 17, 2020

## Overview

- We believe Union Bank of India's (UBI) capital buffers have weakened due to the institution's merger with Andhra Bank and Corporation Bank earlier this year, as well as three consecutive years of accumulated losses.
- We are therefore revising down our assessment of the India-based bank's stand-alone credit profile (SACP) to 'bb-' from 'bb'.
- We are affirming our 'BB+' long-term and 'B' short-term issuer credit ratings on UBI, and the 'BB+' long-term issue rating on the bank's senior unsecured notes.
- The stable outlook reflects our view that UBI will maintain its financial profile over the next 12-18 months despite tough operating conditions, and benefit from government support.

## Rating Action

On Dec. 17, 2020, S&P Global Ratings affirmed its 'BB+' long-term and 'B' short-term issuer credit ratings on UBI. The outlook on the long-term rating is stable. We also affirmed the 'BB+' long-term issue rating on the bank's senior unsecured notes.

## Rationale

We believe UBI's capital buffers have weakened following the bank's merger with domestic peers Andhra Bank and Corporation Bank earlier in 2020, as well as three consecutive years of accumulated losses. We have therefore revised down our assessment of UBI's SACP to 'bb-' from 'bb'.

The COVID-19 outbreak has heightened stress levels and uncertainty across the Indian banking system. This has set back recovery at UBI, which was already grappling with high nonperforming assets (NPAs) and credit costs. S&P Global Ratings forecasts India's GDP will contract 7.7% in the

fiscal year ending March 31, 2021, and rebound by 10% in fiscal 2022.

We believe the amalgamated entity could take more than two years to benefit from the significant improvement in scale and franchise, and generate superior profitability. UBI's Tier 1 capital ratio fell to 10.1% as of Sept. 30, 2020, compared with the pre-merger level of 10.7% as of March 31, 2020.

UBI's risk-adjusted capital (RAC) ratio is likely to be about 4.5% over the next 12-18 months, compared with 4.2% as of Sept. 30, 2020. Our forecast factors in equity capital infusion from the bank's capital-raising plans. We have stopped assigning equity credit to additional Tier 1 instruments issued by Indian public sector banks, including Union Bank, due to uncertainty over their ability to absorb losses on a going-concern basis.

We see signs of a pick-up in economic activity in India since the lockdowns ended. UBI's performance has improved in the first half ended Sept. 30, 2020, in line with the broader banking sector. The bank's net profit was Indian rupee (INR) 8.5 billion in the first half, a marked reversal from the net loss in the previous year. Its gross NPA ratio also reduced to 14.7% as of Sept. 30, 2020, from 15.8% a year earlier. We believe much of this improvement is due to the six-month loan moratorium that ended on Aug. 31, 2020, as well as a Supreme Court ruling barring banks from classifying any loan as a NPA.

While we see upside to UBI's growth and earnings, headwinds to recovery remain. Economic activity in India is soft, and the pandemic is not fully under control. Meanwhile, the sizable pile of stressed assets on the bank's books will continue to be a drag on earnings, in our opinion.

We expect UBI to maintain its very important role and very strong link with the Indian government. The government is statutorily required to hold at least 51% in the bank, and influences the bank's strategic decision-making via its representation on the board and the appointment of the bank's chairman and managing director. UBI has also benefitted from periodic capital infusions from the government to ensure compliance with regulatory minimum capital requirements.

## **Outlook**

The stable outlook on UBI reflects our view that the bank will maintain its financial profile over the next 12-18 months amid tough operating conditions. We also expect government support to continue to underpin the ratings. We classify Union Bank as a government-related entity, and see a very high likelihood that the bank will receive support from the Indian government if needed.

## **Downside scenario**

We would lower the rating by a notch if UBI's RAC ratio falls below 3% on a sustained basis. Large unanticipated asset quality shocks or prolonged operating losses could also result in a downgrade of the bank. Such a situation could arise due to a deeper recession that is beyond our base-case forecast, such that the bank's capitalization deteriorates due to high provisioning costs.

## **Upside scenario**

We believe an upgrade is highly unlikely over the next 12-18 months given the challenging operating conditions in India.

## Ratings Score Snapshot
