

Union Bank of India - receives PCI PIN Certification

Union Bank of India proudly announces its achievement of the Payment Card Industry PIN Transaction Security (PCI PIN) certification. This certification underscores Union Bank's proactive approach to implementing robust security measures and adhering to industry-leading standards to ensure the confidentiality and integrity of all transactions processed through our systems.

PCI PIN certification is a set of security standards established to protect the processing and transmission of card PINs used in transactions. This certification ensures that systems and devices involved in PIN processing comply with security standards set forth by the Payment Card Industry Security Standards Council (PCI SSC) to safeguard customer's sensitive information.

Union Bank of India has consistently demonstrated its commitment to implementing industry-leading practices aligned with international standards for managing its information systems. By adhering to stringent security measures and continuously evolving its security protocols to meet emerging threats, Union Bank of India aims to strengthen customer trust and uphold the integrity of all sensitive data entrusted to the bank.

Union Bank of India's systems, processes and IT facilities are also ISO27001:2013, ISO22301:2019, ISO31000:2018, ISO 27701:2019 & PCI-DSS certified by international certification bodies which provide safe, secure and resilient Banking experience to its customers.
